

Town of Raymond - Water Division

Service Connection Application and Installation Process Checklist

Application

- Complete and submit Application with the Connection Fee (see attached fee schedule)
- Make check payable to Raymond Water Department
- Attach all required support materials
- *At least two weeks prior to the proposed start of work*

Pre-Construction

- Complete and submit Street Opening Permit with fee (see attached fee schedule)
- Provide Contractor Insurance certificates for all entities involved in the work
- Provide Traffic Management Plan [Police Details require coordination with Raymond PD] Identify shoring method for any excavation exceeding 5 feet in depth
- Confirm and Provide Dig Safe Approval (*At least one week prior to the proposed start of work*)
- Purchase and coordinate all required materials and installation services
- All materials and services at owner's expense
- All materials to meet Town specifications per the Water Foreman [tapping saddle, corporation, service line, curb stop, backflow device (if required), meter horn & meter pit]

Construction

- Notify Water Division/Water Foreman of start date at least one week in advance
- All trenching in Town paved surfaces shall be saw cut

Installation

- All water line elements to be installed in sand bedding, including 12" over the pipe
- Trench shall not be backfilled until the pipe installation has been approved by the Water Foreman or his designee
- No blast rock to be included within the backfill material
- Road base materials require a minimum of 18 inches of crushed gravel compacted to 95% below the paved surface
- Permanent pavement [binder and wearing course] to meet thickness of adjacent pavement
- Installation of permanent patch to occur within 10 days
- Contractor for trench maintenance until such time that the permanent patch is in place
- Sweep clean the road surface in the vicinity of water line work and any associated tracking of soils along adjacent road sections.

Fees – SEE ATTACHED CURRENT FEE SCHEDULE

- Materials supplied by the Town of Raymond listed on the Fee Schedule are approximate and will be billed at actual cost plus 10%.
- Charges will be billed for all activities performed by the Town in connection with the installation of this new service line.
- Charges will be billed for all follow-up activities performed by the Town in connection with the installation once the line has been installed and activated.
- The private service line commences at the Town Water main and terminates at the meter. All water line plumbing after the meter is also private.
- The Town of Raymond owns and will repair faulty $\frac{3}{4}$ water meters, meter touch pads and Town owned water mains. All private water lines, gates, vaults, backflow devices, meter pits and related elements as well as plumbing internal to buildings is the responsibility of the property owner.
- All installations requiring a meter in excess of $\frac{3}{4}$ inch and backflow prevention devices shall be paid for by the Applicant/property owner.
- Any abuse of the water infrastructure may result in the termination of your water service and assessment of an array of fines, penalties and fees allowed by law.

If approved the Applicant agrees that they and their Contractor will adhere strictly to Raymond Water Division's "Rates, Rules and Regulations." Any construction activity commenced on the water line prior to this approval and other local permitting and/or inspection will result in double fees and may result in additional penalties.

The Applicant agrees to hire a reputable Contractor who is approved by the Town's Public Works Director to complete all necessary work.

The Applicant understands and agrees that the installation and long-term maintenance and operation of this service line work is their complete financial responsibility and that the Town cannot repair a private service line.
